Dear Preschool Parents:

My name is Kimberly Butcher, and I am the Palermo Union Elementary School District Preschool Director for all preschool sites. Having spent many years working in the field of Early Childhood Development, I have had the opportunity to assist and teach preschool, facilitate afterschool and summer programs, and direct programs for children infant through high school. I am skilled in grant writing and I am continually seeking funding opportunities for the programs I lead. I work closely with our highly qualified staff, ensuring that they receive the support and training they need to be on the cutting edge of early education and development. I welcome opportunities such as back to school night, where I am able to meet our community of families, yours included. If you are currently an active participant in your child's education, I commend you and encourage you to take your participation one-step further. Parent participation can be the strongest link to ensuring our children’s success. If you are not sure how to get involved and need ideas of how you can be an asset in the classroom and/or the district, please speak with your child's classroom teacher. Your involvement will not only benefit your child, but other children as well. I am proud to be part of a team that understands the value of early childhood as the foundation to quality education. Together, with parents, we make a difference for children that spans a lifetime. The Palermo Union Elementary School District Preschool Programs are committed to supporting families. Should there be a need for additional support services in the community, please do not hesitate to reach out to me. These family resources may include, but are not limited to, employment and training opportunities, parenting classes, and health care.

Enclosed, please find a family resource guide and a listing of low cost/no cost people services for Butte County. Additionally, we have included information about how children develop during the preschool years, and how parents can foster this development.

We are happy to assist families with further information regarding any of these topics, including community resources and/or child development. We have access to a wealth of information, including child development, 0 to 18 years.

Please call our office for additional support or resources. I can be reached at (530) 533-4842 Ext. 8.

Sincerely,
Mrs. Kimberly Butcher
Palermo Union Elementary School District
Preschool Director
Preschool Basics: How Children Develop During the Preschool Years
Amy Halliburton, Former MU Graduate Student
Sara Gable, State Specialist, Human Development and Family Studies

The preschool years (ages 2-1/2 to 5) are an exciting time for young children. When they were infants, they developed a trust of their parents/caregivers. As toddlers, they began to establish some independence. Now as preschoolers, they use this trust and independence to actively explore new forms of play (e.g., pretend play) and new environments (e.g., school).

Preschoolers need to learn how to make choices for themselves and how to feel good about the choices they make. It is their job to "learn to take initiative in socially acceptable ways" (Erikson, 1963). Preschool-aged children's style of thinking and learning can best be described as "what you see is what you get," or reasoning based on the way things look. Preschoolers rely heavily on the literal appearance of things as a means of understanding the world around them. For example, if a child breaks her graham cracker into four pieces while her brother breaks his in half, she has more graham cracker than her brother does because she has four pieces and he only has two pieces. Similarly, a child may begin a friendship with another child because of something appealing that the other child has, such as a pretty dress or a new toy.

Adults play an important role in helping children take initiative and explore their environments. Adults' behaviors, attitudes and styles of thinking contribute to preschoolers' development. Talking with children and including them in conversations helps to develop their language skills. It is important to give children opportunities for make-believe play. This helps them to understand themselves and others, and encourages their imaginations. This also gives parents and teacher permission to play.
This guide presents the developmental milestones of the preschool years - accompanied by suggestions for how adults can foster children's positive development. There is special emphasis on issues relevant to preschoolers, including pretend play, the transition to school, and early literacy.

**Development between 30 and 60 months**

Each child grows and develops at his or her own rate, displaying developmental landmarks at different times. For each type of development (such as physical, communication, etc.), younger children's characteristics are at the beginning of each list, older children's characteristics are end of each list.

**Physical Characteristics**

- Gaining strength and coordination
- Increasing control of hands and use of fingers
- Laces shoes Buttons and zips clothes
- Uses toilet independently
- Kicks/bounces/catches a ball
- Paints and draws and cuts with scissors
- Threads beads Jumps/hops/skips

**What can adults do?**

- Provide children with appropriate materials for encouraging small muscle development such as crayons, paintbrushes, scissors, puzzles, blocks, and play dough.
- Provide children with appropriate materials for large muscle development such as balls, tricycles and balance beams.
- Limit television time, help children learn to enjoy being active.
- Create an environment inside/outside the home that encourages physical activity.
- Plan family trips to local parks.

**Thinking and Learning Characteristics**

- Curiosity-Cause and Effect Experimentation
- Recognizing letters and numbers
- Develops an awareness of alike/different
- Develops an awareness of time
- Recognizes colors, shapes and textures
- Develops preference for right or left hand
- Memory skills increase
• Hands-on learning

What can adults do?
• Ask children open-ended questions, "How did you put that puzzle together?"
• Provide opportunities for children to experiment (e.g., mix blue, red, and yellow water, play "sink or float" with cork, rocks, feathers and other objects).
• Display a traditional clock in children's bedrooms; chart children's daily time schedule and post it on the refrigerator.
• Using old scraps of fabric create a quilt with different textures, colors and shapes.
• Make a memory game with cardboard and animal stickers or old pieces of wrapping paper.
• Encourage children to talk about the past, “Tell me about your day, today. What did you do? Whom did you play with?"

Expressing Feelings Characteristics
• Affectionate
• Developing a sense of humor
• Easily encouraged/discouraged
• Demonstrates intense feelings of fear, joy, anger, love
• May show off and demand attention

What can adults do?
• Help children identify and label their emotions verbally (e.g., "You look like you are feeling sad today; did something happen at school?").
• Encourage children to talk about their feelings, recognizing that it is an opportunity to promote closeness with children.
• Carefully observe, listen and respond to children's emotions. Provide baby dolls, puppets, and stuffed animals that children can use in emotional pretend play (e.g., comforting a crying baby doll; pretend argument between stuffed animals).

Awareness of self and others Characteristics
• Displays independence
• Engages in pretend play
• Displays self-control, shares and takes turns, develops friendships
• Shows respect for others belongings
• Learning first and last name, address, phone number, age, sex
Preschool Programs FAMILY RESOURCE Guide
Including, How Children Grow & Develop

What can adults do?
- Provide opportunities for children to work independently and in small groups (e.g., encourage siblings to do a puzzle together; establish individual quiet time with books).
- Create environments that support pretend play.
- Assign children simple chores such as watering plants, checking the mail, dusting bookshelves and cleaning up their toys.

Communication Characteristics
- Asks why/what/who how come
- Possesses a rapidly expanding vocabulary and engages in more complicated conversations
- Enjoys making up/telling stories
- Matches letters with those in own name
- Seeks to write name
- Improves listening skills
- Uses sentences with correct grammar
- Able to verbally resolve conflicts with other children

What can adults do?
- Encourage children to ask questions.
- Engage in conversations with children such as during dinnertime and at bedtime.
- Provide children opportunities to practice copying their name.
- Provide children access to musical instruments such as homemade shakers, drums and bells.

Pretend play and MORE PRETEND PLAY
Preschool children love to play, especially when their play activities involve make-believe with the adults they trust and love. This special type of play, known as pretend play, is particularly important for young children's development. As children's thinking skills improve during the preschool years, they can remember and tell stories that follow a sequence of events and make sense to others. Pretend play is a great way for children to learn and develop skills such as:
- Planning, including organizing the type of pretend play, such as the beach, roles (lifeguard, scuba divers, fisherman), and items/objects needed for the activity (whistle, goggles, flippers, fishing pole, beach towels)
- How to solve problems and compromise. For example, "This time I'll be the lifeguard who rescues you and next time you can rescue me."
• How to communicate through words and actions
• How to express emotions. For example, fear in the face of a child pretending to be a scary animal; delight or jealousy when a new baby comes home from the hospital.
• Creativity and imagination pretend experiences get more complicated and fantastic as children get older. For example, instead of simply being fishermen, they become deep sea explorers, searching for lost treasures on a sunken ship.
• Memory skills, as favorite experiences are acted out repeatedly, such as getting a new pet, eating at a restaurant, taking a trip to the zoo, etc.

You can promote children's development by creating an environment that supports pretend play.
• Establish an area for children's pretend play and provide a variety of items, including purses, hats, shoes, clothing, telephones, kitchen materials, office supplies, junk mail, etc.
• Be sure to offer a storage area for pretend play items. For example, children can hang their "dress up" clothes on an old coat rack and store their other pretend play items in a laundry basket.
• Encourage children to talk about their pretend play. Ask them to describe their pretend play to you: Who were they pretending to be? Why did they want to pretend they were that person? What did they get to do? However, do not interrupt children with questions about their play when they are deep into a pretend play experience. Their fantasy experience can easily be disrupted if they have to shift gears and talk to someone outside of their make-believe experience.
• Engage in pretend play with children. You can enhance children's pretend play by offering suggestions for activities and introducing new words into children's vocabulary. Be sure to follow the child's lead. Let the child direct the fantasy play experience. Research shows that children are more agreeable and can express their developing independence when adults follow the child's plan for the play. Examples of adult-child pretend play activities include having tea parties, bathing baby dolls, setting up a restaurant or beauty parlor, and being a librarian or mail carrier.
• Attend to the theme of children's pretend play. Research shows that, compared to children who engage in little or no violent fantasy play, children who engage in noticeably more violent fantasy play tend to be angrier and less cooperative. Examples of violent pretend play activities include aggressive monsters who hurt people or cops and robbers who kill each other.
Transition to Kindergarten
As the preschool years end, families are faced with the challenge of preparing their children to start school. Preparing for this transition can make the child's experience (and the family's experience) more comfortable. Transitions from preschool to school involves a shift in adult-child relationships and ratios and peer relationships — some relationships end while new ones begin. Children often have mixed emotions about this shift, including a sense of sadness about leaving their preschool or childcare program and a sense of excitement and anticipation about beginning school. The ability to deal with these emotions and adapt to these changes is important for a successful transition, which sets a positive tone for children's adventures in school.

Here are some suggestions that can help you prepare your children for these transitions.

• Arrange a visit to the child's new school. Make sure the child meets his or her new teacher and has the opportunity to explore the new classroom.
• Ask your child's new teacher about the routines that your child can expect in the new classroom. For example, snacks (How many snack times are there during the day?), and lunch (Do children eat in the cafeteria? Will they have to carry a tray?).
• Incorporate aspects of your child's new routine into his or her current routine. For instance, if children eat lunch in the cafeteria, play a game at home where your child can learn how to balance a tray. If children do not take naps at your child's new school, gradually phase out naptime during your child's daily routine at home.
• If your child attends preschool or a childcare program, ask your child's teacher to help phase out naps.
• Talk with children about what will change and what will stay the same. For example, children may have friends that will be in their new class at school, but they will also get to make new friends. Research suggests that children may adjust better to a change of school when they have the support of a friend. Find out if any of your child's friends will be in the same class. If not, ask your child's teacher to put you in contact with another family whose child will be attending the same school and lives nearby.
• Encourage children to talk about their feelings about starting school.
• When possible, volunteer at your child's school. You can attend field trips, read stories to your child's class, and help with special events. If your job prohibits you from volunteering during the day, you may want to use some personal time to volunteer for a special event at your child's school. Parents who cannot volunteer during the day can help by saving materials for art activities or contributing to the school newsletter.
Promoting young children's early literacy
To promote young children's delight in talking, listening, reading and writing, adults need to provide a variety of interesting language experiences. Children who have reading difficulties in the primary grades often had limited early literacy learning experiences. Children with reading difficulties have less letter knowledge, less sensitivity to the notion that sounds of speech are distinct from their meaning, less familiarity with the basic purpose and mechanisms of reading, and poorer general language ability. Children who are skilled readers understand the alphabet and letters. They use background knowledge and strategies to obtain meaning from print, and can easily identify words and read fluently.

Activities that prepare young children for learning to read emphasize:

- Counting Number concepts.
- Letter names, shapes, and sounds.
- Phonological and phonemic awareness. When a child understands that when you change a word in a sentence, you change the meaning, and when you change a letter at the beginning of a word you change the word, hear and say rhyming words, divide words into sounds and/or syllables and put them back together again, and recognize that groups of words have the same sound at the start (fish, frog, fruit), or the same sound at the end (dice, mice, ice).
- When adults show interest in reading.
- Sing songs, make up silly rhymes, read books, and play with words and sounds every day.
- Discuss printed text, words, and sounds as "objects" that can be thought about, manipulated, altered and explored.
- Help children build and use their ever-growing vocabulary. Provide pens, pencils, markers, paper, envelopes, a stapler, paperclips, stamps, a dictionary, an atlas, magazines, catalogues, newspapers, junk mail
- engage in daily literacy activities with your children. Write thank you notes, mail birthday cards, look up phone numbers, find exotic destinations in an atlas, write lists, visit the library.

How Do Speech and Language Develop?
The first 3 years of life, when the brain is developing and maturing, is the most intensive period for acquiring speech and language skills. Language develops best in a world that is rich with sounds, sights, and consistent exposure to adults speaking.

Children vary in their development of speech and language skills. However, they follow a natural progression or timetable for mastering the skills of language. A checklist of milestones for the normal development of speech and language skills in children from birth to 5 years of age is included on the following pages. These milestones help doctors and other health professionals determine if a child is on
track or if he or she may need extra help. Sometimes a delay may be caused by hearing loss, while other times it may be due to a speech or language disorder.

**What is the difference between a speech disorder and a language disorder?**
Children who have trouble understanding what others say (receptive language) or difficulty sharing their thoughts (expressive language) may have a language disorder. Specific language impairment (SLI) is a language disorder that delays the mastery of language skills. Some children with SLI may not begin to talk until their third or fourth year. Children who have trouble producing speech sounds correctly or who hesitate or stutters when talking may have a speech disorder. Apraxia of speech is a speech disorder that makes it difficult to put sounds and syllables together in the correct order to form words.
Voice, speech, and language are the tools we use to communicate with each other.

Learn more and get information on downloading the app on the CDC Milestone Tracker Mobile App Web Site at:
https://www.cdc.gov/ncbddd/actearly/milestones-app.html

**Your Child’s Speech/Language Checklist**

**Birth to 3 Months**
- Reacts to loud sounds YES NO
- Calms down or smiles when spoken to YES NO
- Recognizes your voice and calms down if crying YES NO
- When feeding, starts or stops sucking in response to sound YES NO
- Coos and makes pleasure sounds YES NO
- Has a special way of crying for different needs YES NO
- Smiles when he or she sees you YES NO

**4 months to 6 months**
- Months Follows sounds with his or her eyes YES NO
- Responds to changes in the tone of your voice YES NO
- Notices toys that make sounds YES NO
- Pays attention to music YES NO
- Babbles in a speech-like way and uses many different sounds, including sounds that begin with p, b, and m YES NO
Palermo Union School District
Preschool Programs FAMILY RESOURCE Guide
Including, How Children Grow & Develop

10

laughs

babbles when excited or unhappy
makes gurgling sounds when alone or playing with you

7 months to 12 months

enjoys playing peek-a-boo and pat-a-cake
turns and looks in the direction of sounds
listens when spoken to
understands words for common items such as "cup," "shoe".
babbles using long and short groups of sounds
communicates using gestures such as waving or holding up arms
imitates different speech sounds
has 1-2 words (Hi, dog, Dada, Mama) by first birthday

1 to 2 years

knows a few parts of the body and points to them
follows simple commands
enjoys simple stories, songs, and rhymes
points to pictures, when named, in books
acquires new words on a regular basis
uses some one- or two-word questions (“Go bye-bye?”)
puts two words together (“More cookie” or “No juice”)
uses different consonant sounds at the beginning of words

2 to 3 years

has a word for almost everything
uses two- or three-word phrases to talk or ask for things
uses k, g, f, t, d, and n sounds
is understood by family members and friends
names objects to ask for them or to direct attention to them

3 to 4 years

hears you when you call from another room
hears the tv or radio at the same sound level as others
answers simple Who, What, Where, and Why questions
Talks about activities at daycare, preschool, or friends' homes    YES      NO
Uses sentences with four or more words    YES      NO
Speaks easily without having to repeat syllables or words    YES      NO

This checklist is based upon “How Does Your Child Hear and Talk?”, courtesy of the American Speech Language-Hearing Association. While you may not be able to mark yes for all areas according to your child’s age, if you marked no to most areas, please take your child to their doctor for further evaluation, and/or if enrolled in a child development program, speak with your child’s teacher.

Classroom teacher refer children who may require additional language support to a speech-language pathologist, who is a health/education professional trained to evaluate and treat people with speech or language disorders. The speech-language pathologist will talk to you about your child's communication and general development. He or she will also use special, spoken tests to evaluate your child. A hearing test may also be necessary, as hearing problem can affect speech and language development. Depending on the result of the evaluation, the speech-language pathologist may suggest activities you can do at home to stimulate your child's development. They might also recommend group or individual therapy or suggest further evaluation by an audiologist (a healthcare professional trained to identify and measure hearing loss), or a developmental psychologist (a health care professional with special expertise in the psychological development of children).

RESOURCE GUIDE
Find the resource contact information below at http://helpcentral.org/. Help Central 2-1-1 Butte County has a wealth of resource providers for families. The information below is only a small portion of what is available to families in Butte County. Please visit the website for more information and the ability to search by topic. The Palermo Union Elementary School District Preschool Staff is here to assist you should you need help navigating the website or should you need access to a computer.
